

**MISSION
CRITICAL**

EXTEND THE LIFE OF YOUR DATA CENTER

WITH LIVE RAISED FLOOR REPLACEMENT

**Signs your raised flooring
is failing or has reached
its end of life.**

- Lipping or uneven tiles
- Creaking under weight
- Gaps between tiles
- Tile delamination or dishing

OUR SOLUTION

R2 Mission Critical's founder brings you over 30 years of experience and more than 50 successful live raised floor replacements, with zero servers or data lost. We provide:

- Site condition reports
- Floor evaluations with future planning
- RACKRISE™ live raised floor replacement service
- Support sourcing attic stock and replacement tiles

WHY RACKRISE™?

Our innovative and efficient live-lift system allows your equipment to stay in place while the flooring beneath it is removed and replaced—eliminating downtime and allowing operational continuity.
